

Party member: Please have a seat. How have you been experiencing your first few days as a member of Ingsoc?

New recruit: It's been interesting, exactly what I was expecting to see.

Party member: What were you expecting?

New recruit: I was expecting a group of vigilantes sick of the rule of the evil and vile that has haunted and put a massive silencer on the voices of the people of Oceania. To be in this group has really felt more like home than I've ever experienced. Able to express me able to talk about the things I value and disagree with, something that is to a complete contradiction to the regulations and values of the opposition. This is something that the people of Oceania have never experienced. It truly is something.

Party member: What are your views on the Brotherhood's work against the Party?

New recruit: Just that question alone shows the values that I really appreciate and that I believe in. You asked for my opinion on the organization and to be able not only to have an opinion but a potential criticism on the organization is a type of freedom I really am appreciative of. I believe the organization is a way for us humans to become free from the suppression of the party, I feel like I can speak from a lot of people when I say that it gives the people of Oceania hope that one day we will be able to live a life similar to the way the brotherhood views living. I want my kids and my grandkids to live without the party ruling over the whole country. Without the constant fear of being prosecuted by the government. I think a party is a group of individuals who created a dictatorship to control the people that are under their rule of them. They created this environment so that they are able to take full control of them, if their people do not know the circumstances that they are given are horrendous and controlling they will never try to rebel. They believe that everything they are having is normal and part of the whole world. By making laws that stop them from even thinking they will never realize that they are living in such a controlling place. They try to get everyone brained washed and if the majority are brainwashed then they follow the majority because it's seen as so illegal to even have an opinion on any matter whatsoever.

Party member: From what you're saying you believe that organizations like this one are something the world needs?

New recruit: In this day and age, we need an organization such as this one not only to bring hope but to make a last stand from the party so that the comrades of the world have some sort of humanity left. As well by breaking the views of the big brother you let the citizen that are a part of this organization to be able to views other sides of the way we can live. Instead of being constantly told there's only one way to live your life. In this organization we lift each other up so that we do not have to be bottled up, we understand that we are human and can experience pain, sadness, envy, happiness, and even love. The big brothers' views make it so we can't even feel the simple things of a human.

Party member: Do you believe that we will one day have similar views that we have here out in the real world?

New recruit: I have hope that eventually, it will, I am not certain that in my lifetime I will experience such a thing. I wish my kids and my kids kids would live in a world where they don't have to experience these modern issues and problems. We fight and suffer now so that we will provide a better future for all. The damage that this dictatorship has already done great damage and it won't recover overnight or over years, even if the rules and views are revoked there's a chance that if it happens all overnight then the people will not be able to adjust to the sudden change of their views. It will have to be gradual slowly giving us the right to feel, otherwise, there's a chance that we wouldn't know how or what to do and possibly even become violet.

Party member: Thank you for all your responses.

New recruit: Thank you so much for listening.
