

The Oceanic Tourist Society

Official Letter of Opening from the President

July 1, 1990

Dear all Inner-Party members,

The Oceanic Tourist Society (OTS) is a community organisation consisting of volunteers, staff, and members looking to experience the luxuries of life in Oceania and visit parts of the State they may have not yet seen. Oceania is a vast and expansive land, with thousands of cities and beautiful landscapes just waiting to be discovered.

Our aim is to reward all the hardworking Inner-Party members of the Ingsoc community by providing them with inexpensive trips to many different locations all across the state. One of our main goals with this project was to enlarge the Ingsoc influence in Oceania, and with your help, we can!

Last year, all Inner-Party members were able to get one trip to any destination they wanted for thirty percent off. The available destinations were Cape Town, Havana, Vancouver, Sydney and Rio de Janeiro. To get to these destinations, the OTS provided six luxury trains that ran day and night to provide the Party members with the comfort they deserved.

That year, four hundred Party members took us up on our offer. Out of those four hundred people, three hundred and twenty recommended it to their comrades. Our success with the program motivated us to further expand its range of locations – and after 1 month of maintenance break, this is exactly what we aim to achieve.

The OTS is extremely proud to announce that our train program is up and running, and better than ever before. This year, we have included twelve refurbished trains, stocked up on supplies and comforts. Included in this are two brand new locations, the heart of Texas, San Antonio, and Anchorage. Both of these new locations have amazing experiences and are just waiting to be visited. In addition to San Antonio and Anchorage, you can travel in more style than ever, with the new and improved luxury beds, heated showers, extremely comfortable couches and an “all you can eat” buffet. Now, the best thing, our newest, and proudest innovation yet, the “**TrueTelescreen**”. There will be one TrueTelescreen per seat, and now, you can watch anything you like in full colour.

---- pic of railroad tracks ----

As you all can see, on this map of the world, we have set up a large expanse of train tracks that go through Cape Town, Havana, Vancouver, and they run through Sydney, Anchorage, San Antonio, Rio de Janeiro and New York as well. This whole expanse of train tracks connects all these locations together, and at every location, there is a modernised train station where you can wait, and be dropped off in comfort. This whole entire project has cost the OTS a significant amount of money, however, it was all provided for by Big Brother, our supreme leader, who has been captivated by our outstanding aim to spread our superior ways of life throughout the rest of the world.

Our excellent transport network means that no matter where you reside in the grand state of Oceania, chances are that your nearest “OTS station” is just a few hours away. We have local agents in all major cities who can assist you with transportation options and organise group visits.

Moreover, from July 1 to September 15, all Inner Party members can get a ticket to two destinations for **fifty percent off**. This is an outstanding opportunity for Party members to visit places they have never been before, see how other regions operate within Oceania and spread the ideas of the Ingsoc way. This offer is available to Inner Party members because of their willingness to develop and support the Ingsoc ideology. Without your contributions to this society, Oceania would have descended into chaos, and there would be no order and no way to punish the criminals of society.

Now that the OTS is ready to begin anew, the first tickets for our newest destinations will be available at four pm on the first of July. We truly believe that this will be a very enlightening experience and that anyone in the Inner-Party who is interested, should immediately buy themselves a ticket, get exploring, and spread the Ingsoc Ideology.

As the president of the OTS, I look forward to the new decade and its opportunities to expand the society throughout the Oceanic region. We are looking forward to diversifying our locations to include natural sites as well, with a particular interest in the Grand Canyon, Niagara Falls, among many more. The future We are aiming to provide at least four thousand Inner-Party members with trips around Oceania and we look forward to seeing all the promising members of our great society flourish and expand our great ideology.

Wishing all Party members the very best,

The President of the Oceanic Tourist Society
